EXAMINER'S AMENDMENT

- An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
- The application has been amended as follows: On page 2, of the specification, line 6, after, "filed August 3, 2000", please insert, "now Patent No. 6,748,107".

REASONS FOR ALLOWANCE

- The following is an examiner's statement of reasons for allowance: The present invention is directed towards a data structure embodied in a computer readable medium for storing image information for each component of an image. The closest prior art, Ulichney et al. (USPN 6,487,308 B1), shows a similar system, in which, a method of providing conversion from YUV signals to RGB signals includes the steps of determining a correspondence value between each of the Y, U, and V

pixel values and the corresponding one of the R, G, and B pixel values. The method may be used in a 64 bit embodiment using two registers or one register, the conversion method can easily be augmented to provide color adjustment during conversion without any added complexity. However, Ulichney et al. fail to address: "for wherein an integer field for defining an integer, wherein said integer defines a super or under saturated value for the components and a decimal field for defining fine detail information of the color components". These distinct features have been added to both independent claims and render them allowable.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
